

Sacramento Area Flood Control Agency
**North Sacramento Streams and Sacramento River East Levee
Environmental Consultation Services**

QUESTIONS AND RESPONSES:

Question 1:

Please clarify if the NEPA/CEQA/Permitting consultant will be required to identify and “collect necessary field data”, or if the current consultant team that provides “FEMA certification for the levees” will be collecting such data. If NEPA/CEQA/Permitting consultant is required to “collect necessary field data”, could you please specify the type of data that may be needed (stream flow, soil properties, water quality, land survey, other)? Will the ability to “collect necessary field data” be added to Attachment 1 as part of the consultant evaluation criteria.

Response to question 1:

The successful applicant would be expected to collect necessary field data associated with environmental review that could be impacted by a project alternative. It is not expected any data would need to be gathered for technical analysis associated with a certification effort.

Question 2:

Does the Table of Contents count towards the page limit?

Response to question 2:

No – the Table of Contents does not count toward the 8 page limit.
