

**Sacramento Area Flood Control Agency (SAFCA)  
North Sacramento Streams, Sacramento River East Levee, and  
Lower American River Flood Improvements Project  
SCH# 2014052038**

SAFCA's Board of Directors will be holding a public hearing to consider certification of the Environmental Impact Report (EIR) for the above-referenced project. This hearing will be held on July 16, 2015 at 3:00 p.m. at the Sacramento County Administration Building, 700 H Street, in the County Board of Supervisors Chambers. The Final EIR is available for review on the SAFCA website at [www.safca.org](http://www.safca.org).

SAFCA is proposing to implement improvements to the flood management system protecting portions of the City and County of Sacramento along the Lower American and Sacramento Rivers and their tributaries outside the Natomas Basin. Elements of the proposed project include: levee improvements to approximately 4 miles along the Natomas East Main Drain Canal/Steelhead Creek and Arcade Creek Levees; levee improvements to approximately 6 miles of the Sacramento River East Levee (SREL) in the Little Pocket and Pocket areas; soil erosion repair on the SREL; removal of high-hazard encroachments and vegetation along segments of the Arcade Creek, American River, Beach Lake, and SREL levees to accredit the levees; a corridor management plan, and conservation strategy for the project area.
