File No. 07-1-084

Mr. Timothy Washburn
Sacramento Area Flood Control Agency
1007 Seventh Street
Sacramento, CA 95814

**SUBJECT: TRANSMITTAL OF REPORT ON POTENTIAL GROUNDWATER
IMPACTS OF SLURRY CUTOFF WALLS PROPOSED FOR
REACHES 2 AND 3**

Dear Mr. Washburn:

In response to your request, we have prepared the attached report entitled *Evaluation of Potential Groundwater Impacts Due to Proposed Sacramento River East Levee Improvements with Emphasis on Reaches 2 and 3*. The primary purpose of the report is to provide EDAW with information on the predicted groundwater impacts of proposed slurry cutoff walls along portions of the east levee in the Natomas Basin. As noted in the title, the emphasis is on the impacts of cutoff walls proposed for Reaches 2 and 3, but the report contains preliminary estimates of the impacts of cutoff walls proposed for other reaches. Additional evaluation of the cumulative impacts of all proposed cutoff walls is in progress.

An electronic (pdf file) of the report will be provided via email. Please let us know if you need additional copies or have any questions.

Sincerely,

LUHDORFF AND SCALMANINI
CONSULTING ENGINEERS

Glenn Browning
Senior Hydrologist
